

#002	Return a Book	1.0 unit
As a library user, I want to return a borrowed book, So that I can avoid overdue penalties and allow others to borrow the book.		

The screenshot shows a web application interface for a library system. On the left is a dark sidebar with a menu containing the following items: System, Information, Book management, Reader management, Request management, Return book (which is highlighted), and Statistical. The main content area is white and contains a form with two input fields: 'Book ID:' and 'Reader ID:'. Below these fields is a light blue button labeled 'OK'.

**Confirmation:**

- Success:**

  - The book is marked as returned.
  - User's borrowing history is updated.
  - Any overdue fees are displayed.
- Failure:**

  - If the book does not match any borrowed items, display "This book is not in your borrowed list."
  - If returning after due date, display applicable fees.
